Printed in Great Britain by John Wright & Sons Ltd, The Stonebridge Press, Bristol BS4 5NU

Contents of Volume 67

PAGE

ABRAHAM, B. Intervention analysis and multiple time series 73
ADKE, S. R. and DHARMADHIKARI, S. R. The maximum likelihood estimation of coefficient of diffusion in a birth and diffusion process 571
AITCHISON, J. and SHEN, S. M. Logistic-normal distributions: Some properties and uses 261
AMARAL, M. A. and DUNSMORE, I. R. Optimal estimates of predictive distributions 685
ANDERSON, D. and WATSON, R. On the spread of a disease with gamma distributed latent and infectious periods 191
ATKINSON, A. C. A note on the generalized information criterion for choice of a model 413
BABICH, G. and MADAN, D. B. The relevance of a probabilistic form of invertibility 704
BARNDORFF-NIELSEN, O. Conditionality resolutions 293
BASAWA, I. V. and BROCKWELL, P. J. A note on estimation for gamma and stable processes 234
BHANSALI, R. J. Autoregressive and window estimates of inverse correlation function 551
BOWMAN, A. W. A note on consistency of the kernel method for the analysis of categorical data 682
BRIER, S. S. Analysis of contingency tables under cluster sampling . . . 591
BROCKWELL, P. J. (*See* BASAWA, I. V.)
CHEN, H. J. and TSAI, P. J. Optimal confidence interval for the largest mean in repeated measurements design 119
CHI, P. Y. Testing for homogeneity: The negative binomial distribution . . 252
CLARKE, M. R. B. The reduced major axis of a bivariate sample 441
COOKE, P. Optimal linear estimation of bounds of random variables. . . . 257
COSTELLO, P. and WOLFE, D. A. Partially sequential treatments versus control multiple comparisons 403
COX, D. R. Local ancillarity 279
COX, M. A. A. and PLACKETT, R. L. Small samples in contingency tables . . 1
CUZICK, J. and LINDGREN, G. Frequency estimation from crossings of an unknown level 65
DANIELS, H. E. Exact saddlepoint approximations 59
DARBY, S. C. A Bayesian approach to parallel line bioassay 607
DAUDIN, J. J. Partial association measures and an application to qualitative regression 581
DAVIS, A. W. On the effects of moderate multivariate nonnormality on Wilks's likelihood ratio criterion 419
DEATON, L. W. An empirical Bayes approach to polynomial regression under order restrictions 111
DEMETS, D. L. and WARE, J. H. Group sequential methods in clinical trials with a one-sided hypothesis 651
DHARMADHIKARI, S. R. (*See* ADKE, S. R.)
DONNER, A. and KOVAL, J. J. The large sample variance of an intraclass correlation 719

DUNSMORE, I. R. (*See* AMARAL, M. A.)
DUPAČ, V. Parameter estimation in the Poisson field of discs 187
DURBIN, J. Approximations for densities of sufficient estimators 311
DURBIN, J. The approximate distribution of partial serial correlation coefficients calculated from residuals from regression on Fourier series 335
FAREWELL, V. T. and PRENTICE, R. L. The approximation of partial likelihood with emphasis on case-control studies. 273
FINCH, P. D. Least squares description of a record as signal plus noise . . 539
FORD, I. and SILVEY, S. D. A sequentially constructed design for estimating a nonlinear parametric function 381
FRANGOS, C. C. Variance estimation for the second-order jackknife 715
FRISÉN, M. Consequences of the use of conditional inference in the analysis of a correlated contingency table 23
FUJIKOSHI, Y. Asymptotic expansions for the distributions of the sample roots under nonnormality 45
FUJINO, Y. Approximate binomial confidence limits 677
FUNG, K. Y. (*See* LIM, T. K.)
GATES, D. J. and WESTCOTT, M. Further bounds for the distribution of minimum interpoint distance on a sphere 466
GLASER, R. E. A characterization of Bartlett's statistic involving incomplete beta functions 53
GODAMBE, V. P. On sufficiency and ancillarity in the presence of a nuisance parameter 155
GODOLPHIN, E. J. A method for testing the order of an autoregressive-moving average process 699
GOLDSTEIN, M. The linear Bayes regression estimator under weak prior assumptions 621
GORIA, M. N. Some locally most powerful generalized rank tests 497
GOVINDARAJULU, Z. (*See* GUPTA, G. D.)
GROVE, D. M. The interpretation of forensic evidence using a likelihood ratio . 243
GRUPE, M. R. (*See* TIAO, G. C.)
GUPTA, G. D. and GOVINDARAJULU, Z. Nonparametric tests of randomness against autocorrelated normal alternatives 375
HALL, W. J. and WELLNER, J. A. Confidence bands for a survival curve from censored data 133
HALPERIN, M. Sample size determination in retrospective case-control studies . 577
HALPERN, J. W. (*See* MILLER, R. G.)
HANUMARA, R. C. and STRAIN, W. F. A note on the application of the percentage points of the extreme roots of a Wishart matrix 501
HARRIS, P. and PEERS, H. W. The local power of the efficient scores test statistic 525
HART, A. A. M. (*See* NAGELKERKE, N. J. D.)
